

ANOTHER PERSON'S BLOG.

- if private and no username in session, no access message, link back to home
- if private and a username in session OR public, display up to 10 of latest posts, no edit access
- link back to home

HOMEPAGE

- search bar for people's usernames (view other users' blogs)
- if logged in, link to your blog
- if not logged in, link to login page

MY BLOG

- url contains username
- username in session matches username in url, so edit access
- display up to 10 of latest posts
- Each post has "edit" and "delete" buttons
- "New post" button
- "Settings" button

SETTINGS

- Form asks for:
 - preferred color scheme
 - preferred font
 - privacy (maybe):
 - ↳ only registered users vs. anyone can view
- "Submit" → data saved, return to blog

EDIT POST

- Same form as NEW POST, but fields have stuff in them already.
- "Submit" → overwrites saved post, return to blog

delete post from db, reload

NEW POST

- Form takes:
 - title
 - paragraph post
- "Submit" → post saved, return to blog

Team VIMS

Sarah Yoon

Michael Woo

Vanna Mavromatis

Issac Kim

LOGIN/REGISTER

- Form takes
 - username
 - password
- 2 submit buttons (login, register)
- Once logged in, back to home
- "Register" adds username to users, and new table for <username>'s posts

DATABASE

- Users

Username	Hashed Password	Color Scheme	Font	Privacy
----------	-----------------	--------------	------	---------

- <Username>'s Posts
- Post | Timestamp

Breakdown of Tasks

Sarah Yoon:

- Create display of own blog
- Create settings form and deal with consequent actions

Michael Wu:

- Creation of new post form
- Allow for ability to edit posts

Issac Kim:

- Redirection from homepage to and creation of dashboard page if person logged in
- Redirection from homepage to and creation of login page if not

Vanna Mavromatis:

- Create display of other's blogs
- Allow for ability to search for blogs
